

# SSO PROGRAM STATUS – June 2016

## Program Highlights

- 110 total projects
  - 76 projects completed (over \$870 M construction value)
  - 25 projects under construction (over \$290 M construction value)
  - 9 projects in design (nearly \$140 M construction value)
- Over 450 Program partners

## Looking Ahead

The following projects are expected to advertise for construction bids during the coming months. For more information visit [www.brprojects.com](http://www.brprojects.com).

**Florida Blvd Pump Stations Improvements Project (11-PS-MS-0003):** This pump station project involves upgrading or replacing 8 pump stations with peak wet weather pumping capacity between 530 GPM and 21,240 GPM.

**Lovett Rd-Greenwell Springs Rd Sewer Area Upgrades (10-FM-MS-0049):** This capacity project involves upsizing 450 LF of gravity main with a diameter of 12 in. in diameter and constructing 46,550 LF of force main ranging between 8 and 36 in. in diameter.

**Joor Rd-Greenwell Springs Rd Sewer Area Upgrades (11-FM-MS-0023):** This capacity project involves upsizing 4,960 LF of gravity main ranging between 10 and 12 in. in diameter and constructing 15,830 LF of force main ranging between 8 and 24 in. in diameter.

**Flannery Rd - Florida Blvd Area Rehabilitation Project (Phase 2) (14-AR-MS-0034):** This Rehabilitation project consist of correcting defects in the system in the area of Flannery Rd and Florida Blvd.

**Multiple Pump Stations: Prescott Road – Greenwell Springs Road (11-PS-MS-0034):** This pump station project involves upgrading or replacing 6 pump stations with peak wet weather pumping capacity between 840 GPM and 6,020 GPM.

**North Wastewater Treatment Plant and Sustainability Improvements Project (13-TP-MS-0045 & 13-TP-MS-0047):** This treatment plant project involves replacing the gas mixing system on the anaerobic digesters with a new hydraulic mixing system, installing new equipment including a boiler fueled with digester or natural gas, converting the existing boiler to be fueled with digester or natural gas, replacing sludge heat exchangers, sludge recirculation pumps, belt filter press feed pumps, and a gas flare.

**Hooper Rd Pump Station Improvements (10-PS-MS-0048):** This pump station project involves upgrading or replacing 5 pump stations with peak wet weather pumping capacity between 380 GPM and 21,400 GPM.

**Multiple Pump Stations: Highway 61 – Plank Road (11-PS-MS-0035):** This pump station project involves upgrading or replacing 4 pump stations with peak wet weather pumping capacity between 320 GPM and 9,000 GPM.

**N 38th St. – Gus Young Ave Area Rehabilitation Project (14-AR-MS-0035):** This rehabilitation project consists of correcting defects in the system in the area of N 38th and Gus Young.
