

SSO PROGRAM STATUS – FEBRUARY 2013

Program Highlights

- 108 Active Projects
 - 35 Projects Completed (Nearly \$200M Construction Value)
 - 40 pump stations have been upgraded
 - Over 10,000 manholes have been inspected, rehabilitated, or replaced
 - Over 38 miles of force main improvements
 - Over 450 miles of gravity main improvements
 - 40 Projects Under Construction (Over \$600M Construction Value)
 - 33 Projects In Design (Over \$315M Construction Value)
- Over 350 Different Program Partners

Looking Ahead

The following projects are expected to advertise for construction bids during **1st quarter 2013**. As projects are advertised for construction bid, they will be posted on the SSO Program calendar at www.brprojects.com.

O’Neal Lane Pipeline Projects-Group 1A (10-FM-MS-0008A): The project involves upsizing gravity main in an area that extends north of Florida Blvd to the Monticello Subdivision and continues south to include the Shenandoah and Old Jefferson areas. This project consists of upsizing approximately 54,000 linear feet (LF) of diameters ranging from 6 to 42 inches of forcemain pipe and approximately 12,050 LF of various sizes of diameter of gravity sewer. Expected to advertise March 2013.

O’Neal Lane Stations Projects -Phase A (10-PS-MS-0050): Phase A project involves the upgrade of 17 pump stations ranging in size from 500 gallons per minute (gpm) to 22,000 gpm. The upgrades will work in conjunction with forcemain upgrades in the SFU-C-0005 (O’Neal Lane Pipeline projects) project to alleviate chronic SSOs at and near these pump stations. The upgrades will also allow the pump stations to handle future peak wet weather flows. Expected to advertise late March 2013.
